

From the Director:

Hello and thank you for your commitment to OTA!
We were worried we wouldn't have a season, but your response has been fantastic. Plans are in place for a wonderful event! That said, there are some important things to discuss.

There will be competitors and volunteers at OTA events who fall into the high-risk group for COVID-19, or need to take care of people that are. People with asthma, COPD, heart issues, undergoing chemotherapy or have other immune system compromising conditions. ***For the health of our friends and community, we need to be FLAWLESS in our physical distancing. Wear a mask when physical distancing isn't possible (such as in the washrooms) and wash or sanitize your hands frequently.*** If you have any questions, we will have a volunteer whose sole job is to help you follow COVID-19 protocols.

Everyone coming to the event is required to bring their own MASK, SANITIZER, a PEN, and TOOLS for applying series vinyl graphics to your vehicle. I suggest masking tape, exacto knife / razor and an old plastic ID type card for applying the vinyl and pushing out bubbles. In the past, we've shared these tools, but I want to avoid that added risk on Sunday. Please have your decals on the vehicle by competition start at 12:40 pm.

We are not allowing spectators. If you have crew with you (maximum 4), make sure they have a mask and sanitizer as well. Autoslalom will not be taking place this year in the paddock, so there is lots of room. **Gates will be closed after 9 am.**

CTMP will allow you to camp in the GP track Family Camping area **IF I put your name on a list for them.** Email me ASAP at timeattack@casc.on.ca if you want to camp at CTMP Saturday night.

Please see the attached map of where you cannot park. Maintain 3m / 12 ft between parked cars so that you can change tires while maintaining physical distancing. We will be having registration and the driver's meeting outside with a PA system. If you have hearing difficulties, please come to the front.

Thank you everyone for your added efforts to make this a safe event.

Stephen Deneka

CASC-OR Time Attack Director
