

## Tow Hook Requirement Bulletin

Dear OTA Competitors

### Regarding vehicle extraction at OTA events:

Please note that all competitors must have tow hooks installed or immediately accessible within the car at all OTA events for a timely and safe extraction of the vehicle in question.

OTA nor the track rescue services are responsible for any damages that may arise if tow hook(s) are not available to remove a vehicle off the track. We all share the same responsibility for not wasting expensive track rental time and we appreciate all of your co-operation in understanding this requirement.
