

CASC-OR Server Outage

Dear OTA Competitors

Due to the server outage by Canadian Web Hosting services, we acknowledge that competitors were unable to submit their final car builds for official classification on the CCDB website.

In the spirit of fairness and transparency, any submitted PIP schedules will be taken for face value and reviewed as soon as the service is back online.

As a result of this review backlog, official results will not be posted till all competitor builds are fully reviewed and approved as soon as we are able to.

We sincerely apologize for this disruption beyond our control.

KEVIN WONG

CASC-OR Time Attack Director
